

A CLEAR AND RELIABLE MONITORING OF ALL YOUR CONSTRUCTION SITES

Improve work performance with uninterrupted monitoring and increase productivity.

Thanks to the TimelapseLab **online platform** you can directly monitor all your construction sites, keeping track of work progress and maximizing the functions of operating areas.

The **control panel** shows work progress in real time, allowing you an immediate monitoring and in accordance with **privacy regulations**, thanks to real time obfuscation. With TimelapseLab you keep control over work schedules and its goals, facilitate communication between the project manager and the stakeholders, plan the restock of materials and equipment and much more.

ON THE PLATFORM

Increase productivity thanks to a complete view on all construction sites.

TimelapseLab brings you an innovative software for a clear and reliable monitoring of all construction sites. Monitor everything from a single platform in real time, 24/7.

EVERYTHING UNDER CONTROL, LIMITLESS.

THE IDEAL SOLUTION FOR

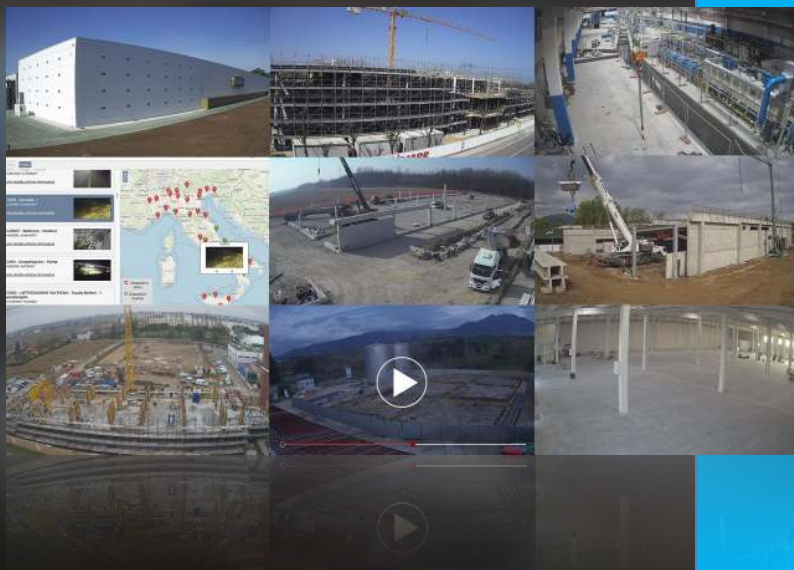

PROJECT MANAGER, CEO, WORK
MANAGEMENT, STAKEHOLDERS, AD.

An instant visual experience

The high flow of information **from corporate areas requires a coherent evaluation on real work progress.** It is essential that collected data must be clear, precise and detailed to react promptly to issues that otherwise would be even more affected by response times.

With TimelapseLab you can view many construction sites simultaneously on a **single platform**, quickly and instantly. Maximize supervision activity, improve in and out communication and decrease response time, avoiding poorly thought-out assessment costs.

An instant and complete visual experience of all construction sites for an efficient information management. All done by preserving remote control on your activities.

A single platform for construction site management and supervision.

View work progress on a single platform, with the ability to focus individually on every construction, download time-lapse videos, and much more.
